

TROPHY BUCK WITH PEANUTS

A blend of all your deer's favorite ingredients. Formulated as an attractant and has added nutrients to increase your herd's health. Peanuts are added to make this feed irresistible to your deer. By feeding Trophy Buck with Peanuts, you will see a higher volume of deer on your property.

Keep em' coming, keep em' healthy and keep em' at your site!

Feed in covered feeders or in a rice bran feeder. Trophy Buck can be fed free choice to deer in their natural habitat as an attractant or as a nutritional supplement to penned deer. This feed can be used as a supplement to pasture forage for deer and can be fed free choice or in measured amounts to provide energy, minerals and vitamins necessary for growth & development, pregnancy, lactation and antler growth. Feeding amounts will depend on where the deer are in the production cycle and how much other forage sources are available.

Helps promote strong and healthy deer!
