

**FEEDING DIRECTIONS:**

Apply to the foliage at a rate of 1 to 2.5 gallons per acre, not to exceed 3 gallons per acre. Apply once the plants have sprouted and reached 4 to 6 inches in height. A second application may be needed 6 to 8 weeks later for optimum growth.

Clark's Plot Nutrients can be used year-round, but are especially beneficial during the spring and summer when turkeys are laying eggs and deer are growing new racks.
