

## **PLANTING RATES:**

Drill 90 Lbs. Per Acre / 120 Lbs. Broad Cast

## **PRODUCT DESCRIPTION:**

Oats are a nutritious feed for all classes of livestock and wildlife as they are high in protein, vitamins and minerals. The oat plant, like wheat, is an annual grass that is great for grazing for livestock, cover crops, hay production, and windbreaks. Common varieties of Oats are Coker, Bob and Harrison. Many varieties are suited a little better for certain climates. All oats are great forage producing varieties for livestock and wildlife during the cool season. Oats should be planted on well prepared plowed ground for best results.

## **PRODUCT INFORMATION:**

- **Application or Use:** Cattle Forage, Livestock Grazing, Cover Crop, Erosion Control, Hay Production
- **Germination Time:** 5 - 7 days, under optimal conditions
- **Growing Locations:** Warm Season, Transition Zone, Cool Season
- **Height:** 12 - 24 inches
- **Sunlight Requirements:** 8+ hours, full sun for best results
- **Advantages:** High yielding, crown rust, mildew and mosaic resistant variety which is winter hardy and grows to medium height.
