

**FEEDING DIRECTIONS:**

Provide free-choice as a supplement to all classes of **goats**. Feed at a rate of one block per 15 to 30 head. Place blocks in each pasture or paddock near areas frequented by goats, such as water, shade or loafing areas. Goats normally consume between 2 and 4 ounces per head daily. Consumption may vary depending on climate, browsing/grazing conditions, and availability of other feeds. In situations where consumption is less than 2 ounces, intake can be increased by providing additional blocks in each pasture.

Provide access to fresh water and free-choice salt at all times.
