

12% ALL STOCK PELLETS

FEEDING DIRECTIONS:

For Lactating Dairy Cows: Offer 12% All Stock Pellets at the general rate of 1.0 lb. of feed per 2.5 to 3.0 lb. of milk produced per head per day. Offer this product along with ample high-quality forage.

Provide clean, fresh water at all times. Do not exceed 0.30 ppm supplemental selenium in the total ration.

FOR BEEF CATTLE ON PASTURE: Offer 12% All Stock Pellets at the general rate of 0.25 to 0.50% of body weight daily along with free choice, good-quality forage for the first 5 days. Over the next 14 to 17 days, cattle may be gradually increased to 2.00% of body weight daily along with good-quality forage.

Always provide clean, fresh water. **FOR**

MAINTENANCE OF MATURE HORSES: Offer 12% All Stock Pellets at the general rate of 0.50 to 1.25% of body weight daily depending on activity level and body condition, along with good-quality forage. Offer half of the daily feed in the morning and the other half in the evening. Make feed changes slowly. For un-acclimated horses, begin feeding at the rate of 0.25% of bodyweight daily, gradually increasing over approximately 10 days to previously recommended levels. Offer clean, fresh water at all times.

FOR GOATS AND SHEEP: Offer 12% All Stock Pellets at the general rate of 1.00% of bodyweight daily along with good-quality forage. After acclimation, goats may be increased up to 2.00% of bodyweight daily along with good-quality forage. Offer clean, fresh water at all times.
