

PLANTING RATES:

Drill 15 Lbs. Per Acre / 20 Lbs. Broad Cast

PRODUCT DESCRIPTION:

Yuchi Arrowleaf Clover is a high-yielding and high quality reseeding clover. The hollow-stemmed plants have large blooms that are pink, white, and purple in color. It is late maturing, and will usually be productive into late July. It will tolerate low pH and sandy soils. Yuchi Arrowleaf Clover is a heavy reseeding clover, providing great perennial food plot for deer, quail, and turkey.

Product Information:

- **Application or Use:** Cattle Forage, Livestock Grazing, Food Plot, Cover Crop, Erosion Control
- **Germination Time:** 7 - 14 days, under optimal conditions
- **Height:** 4 feet; if left uncut/not grazed
