

PRODUCT DESCRIPTION:

Corn gluten feed is a high energy, high protein feedstuff that is an excellent complement to beef or dairy cattle rations. When used to replace grain in the ration, corn gluten feed offers a high level of energy with out high levels of starch. Corn gluten feed is also an excellent source of protein.

FEEDING DIRECTIONS:

Mix with grain roughage and feed to beef or Dairy cattle as a partial replacement for the grain and protein supplement. Adapt cattle to high energy rations over several days. Provide clean fresh water at all times.
